**B. STUDY/RESEARCH PLAN:**

---

**4. Summary of study/research plan:**

The MBA program at Harvard Business School has a management focus and the purpose is to develop leaders. The program is structured to provide students a foundation of knowledge, insights and abilities to help them succeed in a wide range of sectors and industries. The program also has a global reach, since it involves challenges and opportunities from all over the world. Through the active case method environment I will improve my communication skills. Students will learn from one another since each individual brings his or her experience into the classroom. I think HBS will have a tremendous life-long positive impact and will broaden my network. I also believe that an MBA from HBS would help my future career. HBS will have a great impact on enabling me to become a more competent resource for the Swedish community, since managers with international focus are crucial for Sweden.
